

Webdev profile

Flavio Colonna Romano

1. I have not background experience about web development. I am studying Java as programming language and I studied MySql as database.

2. I would like, in the future, to code applications on the web, so I need this program to learn how to do it. It could be a great experience for my programming knowledge.

3. Strength: I know how is the internet architecture because I studied it. I have some knowledge about the object-oriented languages.

Weakness: I do not know a lot things about the programming language that are used on internet.

4. I can help it with my knowledge in database, internet architecture and object oriented language.

5. Yes, I do. [Flavio Colonna Romano](#)
